

FIND YOUR SIZE:

1. Measure around the widest part of your hand with a relaxed open palm.
2. Measure from the base of your hand, to the tip of your middle finger.

Unisex Sizes	XS-Slim*	S-Slim*	XS	S	M	L	XL	XXL
① Hand Girth (CM)	17 - 18	18 - 19	19 - 20	20 - 21	21 - 22	22 - 23	23 - 25	25 - 27
① Hand Girth (Inch)	6.7 - 7	7 - 7.5	7.5 - 7.8	7.8 - 8.2	8.2 - 8.6	8.6 - 9	9 - 9.8	9.8 - 10.6
② Hand Length (CM)	16-17	17 - 18	16 - 17	17 - 18	18 - 19	19 - 20	20 -21	21 - 22
② Hand Length (Inch)	6.3 - 6.7	6.7 - 7	6.3 - 6.7	6.7 - 7	7 - 7.5	7.5 - 7.8	7.8 - 8.2	8.2 - 8.6
Note: *XS-Slim and S-Slim only available in Markhof Pro V3								

The above sizes should enable you the best camera feel without compromising on warmth. If you prefer a looser fit, please consider to go a size up.

As we learn more and more about gloves we also learn that all hands are different. Some people have long skinny fingers and slim wrists, others have wide hands with short fingers.

Our gloves won't fit all even with the right measurements from the sizing chart – but we try!

WHAT SIZE SHOULD I GET IF I'M BETWEEN SIZES?

For many, the best option will be to go up a size if your measurements are in between sizes.

If you are between sizes or if your hands do not fit into the measurements on our sizing chart, we recommend prioritizing the fit for the girth measurement. The girth is the most important measurement and if the girth size on the glove is too small, you won't be able to fit the glove.

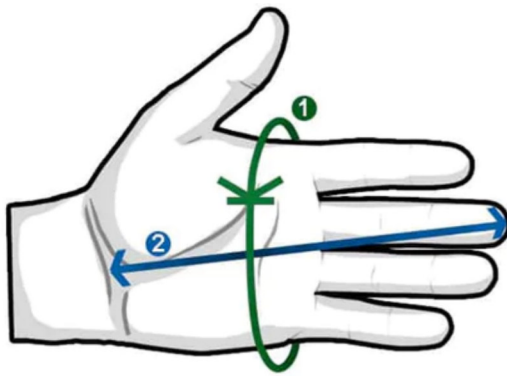

SHOULD I SIZE UP FOR MY LINER GLOVE?

If you're considering pairing a liner glove with your photography gloves, we recommend choosing the same size liner as photography glove. We designed our liners to be thin and fit inside of our photography gloves so we recommend your normal size in liners. There are two exceptions to this:

Exception #1: If you are at the very end of the ratio size in the sizing chart, e.g. 1 mm from being a size Large, then we advise going up a glove size if you plan to often wear the liner with the gloves.

Exception #2: If your personal preference is to wear fairly loose gloves, then you should also go up a size when adding a liner. We don't recommend this as you will compromise dexterity with loose gloves and our priority is best possible camera feel. But you know best what you like!

House tip: Make sure to choose a liner size that is snug/tight on your hand for the best Fliptech performance when wearing liners and gloves together.
